

COOL SOLUTIONS

At A/S Vestfrost, we have decided to focus our business on what we do best – providing refrigeration and freezing solutions. That is all we do. And that is how it has always been, ever since A/S Vestfrost was founded in 1963. So we know everything there is to know about refrigeration and freezing and are therefore not afraid to call ourselves Experts in cooling and freezing Solutions.

With well over 15 million units sold worldwide, A/S Vestfrost is a very experienced manufacturer of refrigerators and freezers.

Our expertise in the field of refrigerators and freezers is unique. It is focused within four dedicated business areas, each structured to take maximum advantage of the valuable synergies with the other.

The four business segments are:

- Merchandising
- Horeca & Wine
- Biomedical
- OEM chest freezer

MERCHANDISING

Our Merchandising products ensure optimum exposure for your products, no matter whether they are sold at petrol stations, beach kiosks or anywhere else. We make good use of our in-depth knowledge of consumer behaviour when developing our products, thus maximising your sales.

HORECA & WINE

Our extensive range of Horeca & Wine products includes upright and chest refrigerators and freezers and elegant wine cabinets capable of meeting individual needs in the hotel and restaurant sector.

BIOMEDICAL

Our Biomedical products are tailor-made to meet the requirements of the pharmaceutical and hospital sectors among others, providing optimum refrigeration and freezing solutions for laboratories and the storage of medicine, vaccines, etc.

VESTFROST

Established: 1963

Ownership: Danish owned group

Business segments:

- Merchandising
- Horeca & Wine
- Biomedical
- OEM chest freezer

Certifications: ISO 9001/ISO 14001 and OHSAS 18001

Head office: Esbjerg, Denmark

Production: Denmark

Export share: >90% – to more than 90 countries

WE KNOW OUR CUSTOMERS' CUSTOMERS

In A/S Vestfrost we do not sell products. We sell solutions. We not only design and manufacture the best refrigerators and freezers on the market, providing optimum storage, but also create well thoughtout practical solutions. We measure our success on how well we know your customers' needs and on how we make use of such knowledge to your benefit. This is part of being your preferred supplier.

FROM IDEA TO FINISHED SOLUTION

We help turn exciting ideas into efficient products. Our product and innovation specialists develop solutions in close cooperation with customers and external designers.

Our specialists make good use of their comprehensive knowledge of consumer behaviour and habits, and of the various sales channels.

And no matter whether it is for a beach kiosk, an à la carte restaurant or a hypermarket, we have the expertise and products to fully meet the requirements.

Our products are manufactured in modern factories to high environmental standards, ensuring top-quality solutions capable of withstanding many years of constant use.

STRONG PARTNERSHIPS

Our continuous effort to ensure optimum solutions requires close partnerships with customers. Our expertise must be combined with our customers' knowledge of specific needs and challenges. We therefore work closely with customers to create the best possible solutions, even when this requires adapting existing products, or inspire customer-centered innovative development.

SOFT DRINKS INDUSTRY

Energy drinks manufacturers choose A/S Vestfrost as their preferred partner because of our global reach and ability to develop innovative solutions together with customers. A/S Vestfrost has, for example, designed customised versions of our classic can cooler in close cooperation with drinks manufacturers. And we deliver the coolers worldwide to logistics and service partners.

COOL BUSINESS COMPETENCES

With more than 40 years' experience in development and production of refrigeration and freezing solutions, we have gathered considerable expertise throughout the value chain. The strong synergies between our three core business segments and the OEM chest freezer production are of prime importance in this respect – it gives us the necessary inspiration to stay in the lead

when it comes to environmental protection and energy saving – and our joint partnership with external designers and innovation experts is also invaluable. Besides this, A/S Vestfrost gains from bulk purchasing on the global market, economies of scale in production and the provision of distribution and after-sales concepts on all markets. All of which greatly benefits our customers.

QUALITY IN EVERY DETAIL

At A/S Vestfrost, we take pride in optimising quality in relation to price. And this applies in every detail. Materials and components must be the best available at the price, and the quality must match the application. Production occurs in modern factories with efficient supply chains.

INNOVATION AND DESIGN

Innovation and product development are given top-priority at A/S Vestfrost and we have a special department dedicated to our efforts in these fields. In addition, A/S Vestfrost works closely with industrial designers to create a functional design with the well-known high aesthetic appeal of our products.

HIGH ENVIRONMENTAL STANDARDS

Environment protection is a key issue at A/S Vestfrost. We strive to be as energy efficient as possible in all links of the value chain – from production to delivered product – and to offer a future-proof solution. We make a virtue of recycling materials and components, and were among the first to offer CFC-free technologies and low-energy products. In short, we are world champions when it comes to environment-friendly, energy-saving solutions.

COOL BUSINESS SOLUTIONS

PURCHASING

Our product solutions can be acquired in several ways, and we are extremely flexible, offering either leasing or purchasing contracts.

WARRANTY

We are happy to provide a warranty for our products as we have complete faith in the materials and technologies with which they are made. Such warranties can cover the entire product or parts of it, and can also include an availability guarantee, giving customers assurance that the products they purchase will also be available in the future.

SERVICE

Even ideal solutions require service now and then when in constant use. This simply ensures that they work faultlessly for many years to come. A/S Vestfrost offers a wide range of service agreements. We have highly competent partners in most parts of the world, who know our products well and can respond rapidly should the need arise. They can merely replace parts or can provide technical assistance, service in connection with product replacement or total service, where A/S Vestfrost has overall responsibility for product operation.

SUPPORT AND TRAINING

Although our solutions may look simple, support or training is often required if they are to be used correctly. Perhaps there is a need for technical training or for assistance in providing precise documentation on product specifications. We can help in both situations, and can also provide general support regarding product use, e.g. how to replace brand advertisements.

STOCKS

We offer agreements in which new products are always in stock ready for delivery, a decisive factor when distribution networks are constantly being extended with new outlets. Such agreements can be made very flexible and are available for standard or customised products alike.

DISTRIBUTION

Distribution is not simply a question of transporting products from A to B. It also involves ensuring that customers receive the products at the best possible time, coordinated with filters for example. Distribution solutions are also required when products are to be replaced. We offer several distribution concepts and have close partnerships with several forwarding agents in most parts of the world.

DISPOSAL

Environmentally responsible disposal of worn-out products can be a comprehensive process. At A/S Vestfrost, we have the necessary organisation to ensure that products are disposed of in the most responsible way. It may be that some components can be recycled while others must be scrapped. We have the solutions to help customers dispose of unwanted products in an efficient and environmentally responsible fashion.

WINE SEGMENT

Wine cabinets from A/S Vestfrost are sold and distributed on a worldwide basis. The unique temperature control combined by features as low vibration compressor, UV-protected glass door, heating element and digital control ensure correct and optimum storage of your wines. The W design range with dual temperature zones makes it possible to store both red and white wines at serving temperatures.

BIOMEDICAL SEGMENT

The SolarChill group consisting of several well-known UN and environmental organisations chose A/S Vestfrost to be the industrial partner in developing a new unique solar vaccine cooler, driven by nature only. A/S Vestfrost has a thorough experience and know-how in temperature control, even under severe weather conditions. Crucial elements to have when it comes to storage of life-saving vaccines.

COOL SUPPORT

On this page, we'd like to introduce you to the team who will always ensure you the perfect solution. We look forward to hearing from you.

COOL COOLING SOLUTIONS

MERCHANDISING

Point Of Sale Coolers

These POS coolers are an ideal refrigeration solution, offering maximum brand exposure. They are quite unique thanks to their optimum cooling ability and easy product access.

Impulse Coolers

The can cooler, originally invented by A/S Vestfrost, combines efficient storage and high mobility with large branding surfaces and elegant design.

Display Coolers

These upright display coolers have an amazing capacity and provide unparalleled versatility in product storage. The robust metal shelves are adjustable, allowing maximum space utilisation for either cans or bottles. The coolers are also electronically controlled.

Display Freezers

Display freezers are the ideal solution for storing all kinds of frozen foods. The sliding glass lid of the chest freezer and the glass door of the frost-free upright provide a perfect view of the contents.

HORECA & WINE

Stainless Steel

Products with stainless steel doors are easier to clean. The stainless steel finish is also extremely attractive.

Wine Cabinets Multizone

Wine is a complex product, which demands careful treatment. A/S Vestfrost's elegant wine cabinets ensure that the wine is kept at the correct serving temperature and also provide an exceptionally attractive wine storage solution.

Wine Cabinets

A good wine experience depends not only on the actual wine, but very much also on the way the wine has been stored. Vestfrost Solutions VKG models are perfect for long time storage.

Chest Freezers

Chest freezers provide lots of room for food storage, either in the kitchen or in the restaurant itself. The chests are also available with sliding glass lids.

Chest Freezers/Coolers with glass lid

These freezers/coolers allow cans, bottles or food items to be stored in the restaurant itself. The ultra-hygienic layout is suitable for a wide range of applications in the hotel and restaurant sector.

Upright Coolers/Freezers

Upright coolers/freezers provide efficient storage of frozen foods thanks to such features as heated doors (which prevent condensation), automatic defrosting, door lock and much, much more.

BIOMEDICAL

Pharmacy Refrigerators

Pharmacy Refrigerators are used for storing medicine and are equipped with temperature monitoring and alarm systems.

DC Refrigerators/Freezers

These 12/24 Volt high insulated coolers and freezers are for connection to solar panels/battery in areas with limited or unstable power supply.

Vaccine Refrigerators/Freezers

Lifesaving vaccines must be stored in the safest possible way. A/S Vestfrost is one of the world's leading suppliers of vaccine coolers and freezers. All our products in this category comply with WHO/UNICEF standards.

Low Temperature Freezers

Temperature as low as -60°C can be maintained in these low temperature freezers. Thanks to their exceptional reliability, user-friendliness and ease of cleaning, these products are the perfect choice for laboratories and hospitals.

POINT OF SALE COOLERS

SERVICE-FRIENDLY LED LIGHT
The service-friendly LED light in the top frame make your products look even more refreshing and appealing.

WHEELS FOR EASY REPOSITIONING
The Point of Sale Coolers are fitted with wheels and can therefore be easily and effortlessly repositioned as required.

PRICE TAG WITH NIGHT LID
The elegant price tag puts a price on your product but that is not all. A built-in lid, hidden under the price tag, can be used as an energy saver when the store is closed.

BRANDING
All sides of the POS cooler can easily be branded and later easily be re-branded.

STIMULATING YOUR IMPULSE SALES

A/S Vestfrost has dedicated an entire range of high-quality coolers to develop your impulse sales. These well-designed products are not only cool-storage facilities but also highly flexible products in terms of usage and placement, and provide high product and brand exposure.

- Maximum product visibility and access
- Position and plug-in – ready to sell

CAN COOLERS

1 EASY TO USE
Connect CC 48 to an electricity supply during the night, and the can cooler cools the products and charges the integrated ice-lining, so it is ready to be used without power in 12 hours.

2 ANTI-SCRATCH WRAPPING
The transparent plastic wrapping of the CC 48 and CC 68 can coolers has an anti-scratch surface, and the branding is easy to change.

3 ADJUSTABLE THERMOSTAT
The adjustable thermostat in the bottom of the can cooler makes it suitable for all kinds of drinks and climates.

4 NEW POP-UP SYSTEM
The optional pop-up system for the CC61 is practical as it ensures that the products are always available in the top of the cooler.

KEEPS THE PRODUCTS COLD AND YOUR BRAND VISIBLE

The can cooler, originally invented by A/S Vestfrost, combines efficient storage and high mobility with large branding surfaces and a distinguished design. An impulse attraction.

- The transparent self closing lid provides easy access
- The integrated fan ensures constant air circulation and rapid cooling
- The attractive silk-printed scratch-resistant surface makes your brand stand out
- Also available with easy changeable wrap

STAINLESS STEEL COOLERS/FREEZERS

CLEAR VISIBILITY
A lamp on the inside of the lid provides good visibility of stored items.

EXTERNAL TEMPERATURE ON CHEST FREEZER
The external digital thermometer provides a visual check on the cabinet temperature of the chest freezers.

EXTERNAL TEMPERATURE ON UPRIGHT PRODUCTS
The upright products have external digital temperature display as well. This feature makes it unnecessary to open the cooler or freezer to check the temperature.

STAINLESS STEEL WITH MANY FEATURES
The good lighting and transparent drawers and flaps maximise the visibility in the product.

STAINLESS STEEL FOR THE HOTEL, RESTAURANT AND CATERING SECTOR

The A/S Vestfrost stainless steel series of coolers and freezers offers solid, no-nonsense quality that just lasts and lasts. The robust chest freezers in stainless steel are perfect for many frozen items. They are available with counterbalanced lid, digital display, lock and inside lighting. These storage freezers have a wide field of applications within all food segments. They are especially suitable as working tables in big kitchens, bakeries, shops etc. and also perfect for back-room storage of ice-cream.

- The upright freezers and coolers can be placed side-by-side or stand alone
- The stainless steel coolers and freezers are a robust solution with perfect space utilisation

CHEST FREEZERS

1 SAFE STORAGE
A safety lock prevents unauthorized access to the products.

2 COUNTERBALANCED LID
Counterbalanced load bearing lid ensures easy opening and closing.

3 EXTERNAL TEMPERATURE
The optional external digital thermometer provides a visual check on the cabinet temperature.

4 STACKABLE BASKETS
Optional spacious, stackable baskets allow organized storage of your food

CHEST FREEZERS FOR ANY NEEDS

The SB and HF series offers solid, no-nonsense quality that just lasts and lasts. The freezer is especially suitable for back-room storage of ice-cream and all kinds of frozen foods. The cabinet is designed to withstand being opened many times each day while still maintaining the correct temperature.

- The HF series is also available with counter balanced glass lid.
- The optimized SB models with 80mm insulation are all in energy class A+ which provides low running costs.

CHEST FREEZERS/COOLERS WITH GLASS LID

SAFE STORAGE
A safety lock prevents unauthorized access to the products.

WHEELS FOR EASY REPOSITIONING
The freezers are fitted with wheels and can therefore be easily and effortlessly repositioned as required.

EXTERNAL TEMPERATURE
The external digital thermometer provides a visual check on the cabinet temperature.

SLIDING LID
The sliding lid ensures visibility and at the same time highly economical cooling capacity. It is possible to open the lid at both the left and right side.

DISPLAY FREEZERS AT THE POINT OF SALE

This display and storage cabinet in the IKG-series with sliding glass lid is ideal for ice-cream or any other kind of frozen goods. The cabinet is designed to withstand being opened many times each day while still maintaining the correct temperature.

- The display freezers are perfect for storage of ice-cream and frozen food
- The transparent sliding glass lid in the display freezers or the heated glass door stimulates impulse buying and optimizing your sales

WE SELL SALES

UPRIGHT COOLERS/FREEZERS

INTEGRATED LOCK
An integrated lock on some models prevents unauthorised access to products.

METAL PLATE SHELVES
The metal plate shelves on the M 200 ensure that bottles and cans stand more firmly and securely than on wire shelves. It is even possible to get your branding on the shelves.

GOOD VISIBILITY
The lightning gives you a clear view to the content of the cooler, and the flexible shelves allow you to make room for all your products.

EXTERNAL TEMPERATURE ON SOME PRODUCTS
External digital temperature display makes it unnecessary to open the cooler to check the temperature.

BOTTLE COOLER OF THE FUTURE

The large display coolers in the M-series from A/S Vestfrost provides increased capacity. Extremely adaptable in use, the shelves can be moved to accommodate alle types and sizes of cans and bottles. At the same time, the optional metal shelf plates ensure that products stand firmly and securely, and do not wobble or fall. Other features include a strong, yet stylish and tactile door handle.

- Optional metal shelf plates ensure that bottles and cans stand firmly
- The powerful cooling and ventilation system ensures correct temperature, even under difficult conditions

M 200

Upright coolers also available with energy efficient LED light

PHARMACY REFRIGERATORS

1 ALARM DISPLAY
The storage of medicine is a question of security. The clear digital alarm display makes a sound if the temperature changes.

2 INTEGRATED LOCK
An integrated lock prevents unauthorised access to products.

3 TOP LIGHT
The top light ensures maximum visibility to the products.

4 FLEXIBLE SHELVES
The AKG-shelves are flexible allowing you to make room for all your products.

AKG 377

RELIABILITY IS IMPORTANT

The AKG-series is developed for the storage of medicine in pharmacies, laboratories and hospitals. With extreme accuracy the AKG-refrigerators are reliable with features like temperature control etc.

- Safe storage of medicine for the medical industry
- Reliable features that supports the handling of the vital medicine

Extractible drawers with partitions for rational storage are available as extras

DC REFRIGERATORS/FREEZERS

RACK SYSTEMS
A/S Vestfrost energy efficient freezers and refrigerators with 100 mm insulation are suitable for rack systems. Freezer depth provides room for three racks.

ROBUST HANDLE
A robust handle with built-in lock prevents unauthorised access to the contents of the medicine cooler and freezer.

CLEAR VISIBILITY
A lamp on the inside of the lid provides good visibility of stored items.

EXTERNAL TEMPERATURE DISPLAY
External digital temperature display makes it unnecessary to open the SOE to check the temperature.

OFF-GRID POWER SYSTEMS

For off-grid power systems, it is vital to have reliable and energy efficient equipment that will last for years. Our 100 mm insulated appliances of prepainted galvanized steel with latest Danfoss 12/24 V BD compressors are a guarantee for that. The compressor is controlled by an electronic unit that includes protection against overload and destructive battery discharge.

- Easy to operate and maintain
- External temperature reading

VACCINE REFRIGERATORS/FREEZERS

1

EXTERNAL DIGITAL DISPLAY
The external digital display facilitates temperature monitoring. The display is solar driven to ensure continued temperature readings.

2

ROBUST HANDLE
A robust handle with built-in lock prevents unauthorised access to the contents of the medicine cooler and freezer.

3

SPECIAL ICELINING FEATURE
The icelining and ballast boxes ensure temperature stability and extended hold-over time in case of power failure.

4

ICEPACK FREEZING
Separate compartment for icepack freezing simultaneously with vaccine storage in the main compartment.

VACCINE STORAGE POWERED BY NATURE

A/S Vestfrost is proud to introduce the Vaccine Refrigerator powered by nature – the Solar Chill. A new technology where the appliance is solely driven by the sun, directly from solar panels without use of inconvenient and expensive lead batteries for energy storage.

Life-saving vaccines must be stored under exacting conditions to ensure maximum efficacy. The icelined Vaccine Refrigerators/Freezers from A/S Vestfrost are all approved by WHO/UNICEF.

- Solar Chill is environmentally friendly, driven only by nature – no need to pay electricity or fuel
- The Vaccine Refrigerators/Freezers are extremely reliable and stable

*** Measured at an ambient temperature of 43°C.
**** Autonomy in ambient temperature of 32°C.

LOW TEMPERATURE FREEZERS

RACK SYSTEMS
A/S Vestfrost low-temperature freezers with 80 mm insulation are suitable for rack systems. Freezer depth provides room for three racks.

DIGITAL THERMOMETER
A digital thermometer facilitates temperature monitoring. An automatic alarm, activated by undesirable temperature rises, reduces the risk of damage to frozen items in the freezer.

ROBUST HANDLE
A robust handle with built-in lock prevents unauthorised access to the contents of the freezer.

WHEELS FOR EASY REPOSITIONING
The freezers are fitted with wheels and can therefore be easily and effortlessly repositioned as required.

RELIABLE LOW TEMPERATURES

A/S Vestfrost's low-temperature freezers make it possible to maintain temperatures as low as -60°C. Supreme stability, reliability, user friendliness and ease of cleaning make these freezers ideal for laboratories and hospitals.

- The products have clear digital thermometer and electronic thermostat for precise temperature control
- White, galvanised steel inner liner make a hygienic surface
- An acoustic alarm sounds if the temperature rises
